The climate of Iceland is subarctic (Köppen climate classification: Cfc) near the southern coastal area and tundra inland in the highlands. The island lies in the path of the North Atlantic Current, which makes its climate more temperate than would be expected for its latitude just south of the Arctic Circle. This effect is aided by the Irminger Current, which also helps to moderate the island ...

Is climate change a cult? The simplest answer is “Yes”. Even the use of children to promote it, which is a throwback to the Children’s Crusades in the Middle Ages, indicates that it is a cult, in addition to the excoriation and shunning of anyone who dares to question the pronouncements or disagrees with the “leaders”.
