Monovision Lasik

Monovision LASIK is a specialized technique in LASIK surgery to reduce or eliminate the need for reading glasses. Monovision LASIK works by correcting one eye for emmetropia (distance) and the other eye for myopia (near vision).

Monovision LASIK - EyeWiki

Definition: Monovision is the optical status of having one eye focus at distance and the other eye focused at near. This optical condition allows the relief of presbyopia symptoms.

MonoVision

When you have LASIK, you and your doctor may decide to leave one eye slightly nearsighted. This is called monovision and may allow you to maintain your ability to read without glasses after you begin to experience presbyopia (the need for reading glasses as you get older).

Monovision LASIK Vision Correction - TLC Laser Eye Centers

Step 1 - Pre-Op Exam & Questions Step 2 - LASIK pre-operative area to help you relax and prepare for your procedure Step 3 - Enter Laser Suite for two-step procedure: flap-creation and laser correction.
