Rated 1 out of 5 by Carlos18 from Broke after two moths The freezer worked well for the first two months but once the weather warmed up into the 90s it quit working. It's advertised to work up to 110 degrees but the tech said the unit was overheating so he ordered parts. Well I've been trying to get this unit fixed now for 4 weeks and have just learned that the parts are backordered even though ...

How it Works. A refrigerant such as Freon mixed with a small amount of a lightweight oil (to lubricate the compressor) is compressed by the compressor causing it to become a hot, high pressure gas, this hot gas runs through a series of coils (the red coils in diagram) and with the help of the fan dissipates this heat to the outside.
